

## **Inari Medical to Announce Second Quarter 2022 Financial Results**

July 18, 2022

IRVINE, Calif., July 18, 2022 (GLOBE NEWSWIRE) -- Inari Medical, Inc. (NASDAQ: NARI) ("Inari"), a medical device company with a mission to treat and transform the lives of patients suffering from venous and other diseases, announced today that it will release its second quarter 2022 financial results on Wednesday, August 3, 2022. In conjunction with the release, Inari will host a conference call and webcast at 2:00 p.m. Pacific Time / 5:00 p.m. Eastern Time to discuss its financial results and recent highlights.

To access the live call via telephone, please register in advance using the link [here](#). Upon registering, each participant will receive an email confirmation with dial-in numbers and a unique personal PIN that can be used to join the call.

The live webinar may be accessed by visiting the Events Section of the Inari investor relations website at [ir.inarimedical.com](http://ir.inarimedical.com). A replay of the webinar will be available shortly after the conclusion of the call and will be archived on Inari's website.

### **About Inari Medical, Inc.**

Inari Medical, Inc. is a medical device company with a mission to treat and transform the lives of patients suffering from venous and other diseases. Inari's current product offering consists of two minimally invasive, novel catheter-based mechanical thrombectomy devices that are designed to remove large clots from large vessels and eliminate the need for thrombolytic drugs. The company purpose-built its products for the specific characteristics of the venous system and the treatment of the two distinct manifestations of venous thromboembolism, or VTE: deep vein thrombosis and pulmonary embolism. The ClotTrievers system is 510(k)-cleared by FDA and CE marked for the non-surgical removal of clot from peripheral blood vessels, including for the use in the treatment of deep vein thrombosis. The FlowTrievers system is 510(k)-cleared by FDA and CE marked for the non-surgical removal of clot from peripheral blood vessels, including for the use in the treatment of pulmonary embolism and clot in transit in the right atrium.
